

STUDENTS!

Get Published, Get Noticed...

Contribute an article to the oldest water works publication in the U.S.

The *Journal of the New England Water Works Association, Inc.* is the oldest water works publication in the United States. Since its inaugural issue in 1886, the *Journal* has seen articles written by the pre-eminent engineers who developed filtration, chlorination, and standards used to this day. Still going strong, the *Journal* is always looking for fresh content to add to its history.

As a student, the *Journal* is an excellent way to get noticed by your peers, fulfill a publications requirement for your degree, market to future employers, and have your work distributed worldwide to subscribers.

8 Great Reasons to Become a NEWWA Journal Author:

1. Positions you as a thought leader and industry expert
2. Gives your work visibility and recognition in the drinking water and wastewater professions
3. Establishes and/or builds your credibility at your university/company and among your peers
4. Preserves your work in a permanent record
5. Expands your professional network, increasing potential for collaboration, interaction, and opportunities
6. Mentors and supports ongoing education and information sharing throughout the profession
7. Boosts your professional credentials and promotes career advancement
8. Qualifies you for the prestigious Dexter Brackett Medal & Past President's Award

So how do you get published?

First, consult with your professor/advisor about the subject matter/project/research you would like to write about. Once cleared, view the “Guidelines for the Preparation of Papers for Publication” and editorial calendar at newwa.org under the “Publications” tab OR by scanning the QR code to the left.

You can then submit an abstract to *Journal* Editor, Michelle Clements, at newwajournal@gmail.com with your article idea.

Thank you from the NEWWA Publications Committee!
